

EASY, LONG RANGE, POWERFUL

Versatile, tough, innovative.

Take a full system snapshot quickly and easily with the Job Link® System Probes. All measurements can be sent up to 1000' away directly to your mobile device with the Job Link® System mobile app. We designed and built each tool to be tough, accurate and exactly what a pro in the field needs.

Job Link® System Probes, JL3KH6, JL3KR4

- Directly connects to mobile device with Job Link® System App
- Pressures auto calibrate at any elevation
- Wireless range of 1,000'
- Great for critically charged systems
- Fast accurate temps with Rapid Rail® technology
- Reduce call backs

JL3KR4 Job Link® System Charge Test Kit

2 Temperature Pipe Clamps 1 Padded Protective Case
2 Pressure Probes

JL3KH6 Job Link® System Charge and Air Kit

2 Temperature Pipe Clamps 2 Psychrometer Probes
2 Pressure Probes 1 Padded Protective Case

Job Link

Pressure Probe, JL3PR

Pipe Clamp, JL3PC

Flex Psychrometer, JL3RH

45° angled fitting easily connects in tight spaces	LED and beep indicate accurate connection	Place in critical locations based on system needs. Requires only a 3/8" hole for duct testing.
Pressure sensors are accurate at any elevation	Ambient air conditions doesn't affect measurements	Flex wand and strong adjustable magnet for hands free measurements
Field replaceable gasket	Narrow jaw connects in tight spaces	Measures %RH, dry and wet bulb, dew point, and enthalpy
Great for critically charged systems	Communicates wirelessly with SMAN® Refrigerant Manifolds (SM380V and SM480V)	Communicates wirelessly with SMAN® Refrigerant Manifolds (SM380V and SM480V)
